

The D'Olive Watershed Management Plan II Community Update

July 27, 2020

Thank you for attending our community google meeting on July 14th, 2020! Despite the COVID threat, a crowd of approximately 40 community stakeholders was in attendance. In a short time, you all were able to cover a lot of ground and helped to focus our efforts! A very diverse group of stakeholders assembled representing different interests within the watershed. Stakeholders represented Daphne, Spanish Fort, non-profits, residents, utilities, and media.

Tiawasee Creek Restoration-Lake Forest

We asked you all to help us to identify the strengths, weaknesses, and opportunities within the D'Olive Watershed and if time allowed to help identify the top in each category. You identified strengths, weaknesses, and opportunities in just 1.5 hours! Here are the top things we heard:

Strengths	Weaknesses	Opportunities
<ul style="list-style-type: none">•Completed Watershed Restoration Activities•Stormwater Management Regulations•Partnerships•Presence of Local Environmental Departments	<ul style="list-style-type: none">•Stormwater Management Regulations•Education Outreach•Erosion & Sediment•Sanitary Sewer Overflows	<ul style="list-style-type: none">•Education Outreach Events, Socila Media, & Materials•Update Stormwater Managment Regulations•Continue Restoration•Recreation Access

We currently have a survey available to gather additional information from community stakeholders that were not able to attend this workshop in person. Please share it with your network. Additionally, if there is something that you feel didn't get covered at the meeting or that you forgot to mention, feel free to complete the survey yourself! Scan the QR code with your smartphone or visit the website below!

<https://bit.ly/DOLiveComments>

Take our survey!

We will follow up with you all with another survey to further prioritize the opportunities within the watershed. Keep an eye out! Our next steps are to develop these opportunities further by following the planning process and report back to the stakeholder groups towards the end of the year. Thank you all for your continued support! Please let us know if you would like to be more involved in the process. We have lots of volunteer opportunities!
